

Product Brief: SciFi Helmet

Asset Request for Unity Game Project - June 2024

Overview

We need a futuristic combat helmet for our sci-fi shooter game. The helmet should look like a full-coverage space marine visor with a dark visor, angular plates, and a rear ventilation system.

Dimensions

Overall height: 280 mm
Width (temple to temple): 220 mm
Depth (front to back): 260 mm
Visor opening: 120 mm wide x 40 mm tall
Unit of measurement: mm

Shape & Geometry

Base shape: Custom (sphere-derived)
Hollow: Yes
Features: angular cheek plates, raised forehead ridge, side vents
Symmetry: bilateral

Material & Finish

Material: Carbon Fiber composite with polymer visor
Body color: Matte Black
Visor: Transparent dark tint
Surface texture: Brushed with subtle panel lines
Estimated weight: 850 grams
Quantity: 1 unit

Notes

Asset should be optimized for real-time rendering (game-ready mesh). Target polygon count: under 15,000 triangles. Must include normal map baking reference mesh.
